

Northeast Habitats & Highways

Offering New Ways to Think About Transportation Infrastructure and Wildlife

What if your work could help wildlife move more freely—and make our roads safer and more resilient at the same time?

Northeast Habitats & Highways is a new video series created in partnership with transportation and wildlife agencies across the Northeast. It's designed for professionals like you—people working in transportation infrastructure, planning, conservation and beyond—who want to better understand how roads and ecosystems intersect, and how we can do things differently.

Why This Matters:

This isn't just another training. Habitats & Highways is about shifting how we think, plan and collaborate. It's about building a shared understanding of road ecology and turning that knowledge into action—whether you're designing a culvert, reviewing a project proposal, or shaping long-term transportation and wildlife plans. Habitats & Highways is about empowering transportation practitioners to plan, design, build and maintain safer and more wildlife-friendly transportation infrastructure.

How to Watch:

Northeast Habitats & Highways is available on YouTube in five easy-to-navigate sections. [Click here](#) or scan the QR code to get started.

What You'll Learn:

Five videos totaling roughly 90 minutes explore:

- The science behind road and wildlife conflicts and the implications for both people and nature
- Tools for evaluating habitat connectivity and planning and prioritizing projects
- Real-world examples of wildlife-friendly infrastructure solutions
- The many ways partnerships are improving projects and spreading knowledge
- Strategies for ensuring long-term success

You'll also hear directly from professionals across the region—people who are already leading the way. Their stories and insights will spark ideas and show what's possible when we work together. Whether you're new to this topic or already involved in connectivity work, this training will give you practical tools and fresh inspiration. You'll come away with ideas you can apply right away—and a clearer sense of how you can contribute to the growing promise of road ecology.

“

"The Habitats & Highways series is a compelling example of how conservation and transportation professionals can work together to protect both people and wildlife while building safer, more sustainable infrastructure."
